2. INTRODUCTION

Barnes processes credit transfer payments and outsources checks through Bank of America. This is a functional specification for the integration between [Bank of America and M3](#). The purpose of this document is to specify the outbound file requirements that need to be built for ACH payment files and CHK Payment files from M3 APS130 Payment Proposal.

3. INTEGRATION SCOPE

This document handles the description of the outbound interfaces between M3 and Bank of America system which includes ACH and CHK.

3.1 Integration Overview

3.2 Prerequisites

Electronic fmt		Print amounts	1
Bank operation	CH Checks	Min amt due	
Exch rate type	1	Foreign/domest	
FAM function	2		

- **CRS165 Number Series (For ACH)**
 - Payment Advice: 67 – A, defined at company level
 - Payment Proposal: 80 – 0, defined at division level
 - Payment Reference: 89 – 0, defined at division level
- Check No. – Should start at 88 and Kim to send the last check number used.
- BOD – SyncCreditTransfer must be activated for all divisions (For ACH)
- Custom BOD – Copied from SyncCreditTransfer (For CHK to trigger Document 504)

3.3 Deliverables

The work and deliverables to this specification will encompass the following:

- A CSV file to be developed for ACH/CHK, file format and structure. The bank transfer payment methods ACH and CHK will call APS160 and APS140 program and create the CSV file. M3 creates one CSV file for each payment proposal/payment order in the selected payment method.
- Connection Points

- A dedicated folder for Credit Transfers and Outsourced Checks – a folder should be created specifically for Credit Transfers and Outsourced Checks in the SFTP server

4. INTEGRATION MESSAGES / MAPPINGS

4.1 Messages

The documents identified for the integration are listed here:

Document Name	Connector Type	From	To	Type	Comment
SyncCreditTransfer	M3 ION OUT	M3	ION	ION Infor Connection	Is a standard message in Local.ly GEMS
SyncCreditTransfer (CHK)	M3 ION OUT	M3	ION	ION Infor Connection	Copy from Standard BOD SyncCreditTransfer and connect to Document 504

4.2Major Features

- M3 to produce 4 CSV files: ACH Header, ACH Details, CHK Header, CHK Details (Separator: "|")
- Files shall follow naming convention YYYYMMDD_PaymentMethod_HDRorDTL_000(Sequential per day) e.g 20240816_ACH_HDR_001
- User to confirm payments every Wednesday of the week and payment date shall be dated as the following date. Unless following day is a holiday, then checks must be confirmed a day in advance.
- The BOD is triggered when Payment Proposal has been confirmed.

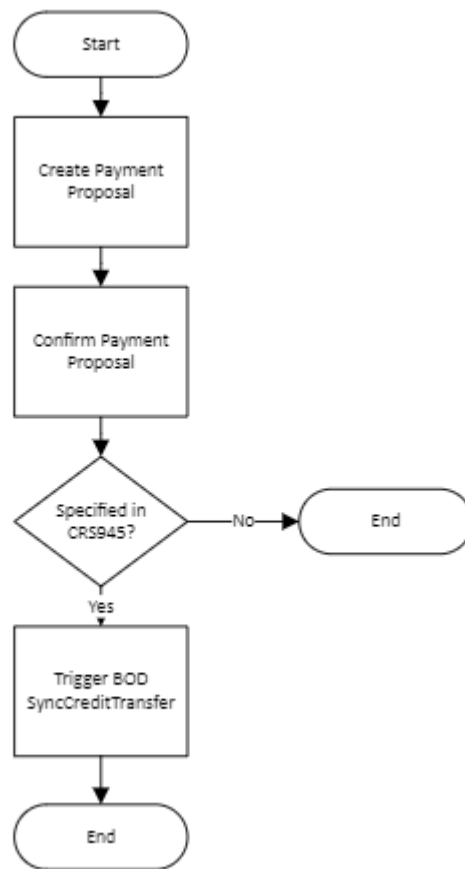

4.2.1 Mapping

Field mappings from BoA integrated payables file structures and M3 APIs

BoA(M3 to JBA)Field
Mapping_V3.xlsx

5. PROCESS MODEL

5.1 Document Flows

Note: Add the image as a visualization of the document flow that needs to be setup in ION. Actual flow will vary depending on the technical requirements.

5.2 Message Exception Handling

5.2.1 ERROR NOTIFICATIONS

6.1 Functional Testing
